

MULTIFAMILY RECYCLING SERVICE MANAGEMENT TIPS

Routine outreach, communication, and collaboration are critical to the success of a recycling program.

We ask that you keep communication open with our office about recycling performance at your property, and we encourage you to share recycling info with all team members.

Our office is available upon request to assist with education, events, and training. Please be aware we are a small team and have limited availability for door-to-door outreach.

Below are tips to help make recycling successful at your property.

- Increase social media outreach & email communication
- Ensure recycling carts, dumpsters, or chutes are clearly labeled
- Implement weekly inspections of containers before & after service
- Host on-site educational events - contact us!
- Adjusting containers & outreach during move-in & out
- Ensure all team members are knowledgeable about recycling service
